

## I. Intro

### A. Good worldviews must: (Jason Lisle, *Ultimate Proof of Creation*)

1. Be \_\_\_\_\_ consistent (no internal \_\_\_\_\_)
2. Provide the \_\_\_\_\_ (conditions that must be \_\_\_\_\_ before we can \_\_\_\_\_ about the universe)
3. A good worldview must meet these criteria (Robert Stewart, *Insufficiency of Naturalism*):
  1. C \_\_\_\_\_
  2. C \_\_\_\_\_
  3. C \_\_\_\_\_
  4. C \_\_\_\_\_
  5. C \_\_\_\_\_

### B. Assumptions

1. Everything we see we see with a \_\_\_\_\_ view
2. There is no such thing as \_\_\_\_\_ information

## II. Definitions

### A. Creationism

1. The belief that God created the earth in \_\_\_\_\_ and all species of animals originated from certain kinds that God created. This God handcrafted \_\_\_\_\_, Adam and Eve, roughly 6 to 10 thousands years ago and from them all humanity has descended from

### B. Evolution

1. The belief that all life originated from a \_\_\_\_\_ that appeared from matter several millions of years ago (the number changes often). Additionally, it believes the earth is somewhere between \_\_\_\_\_ years old (depends on the source)
2. Needs 3 things:
  - a. Time
  - b. Mutations
  - c. Natural Selection

### C. Naturalism

1. The \_\_\_\_\_ stemming from evolution that denies the existence of \_\_\_\_\_, holds to the belief that all humans evolved from a single-celled organism, and incorporates the evolutionary tenets of survival of the fittest, natural selection and no ultimate authoritative Being into their thought process

### III. Philosophically

A. If we are just collections of bodily systems that happened to survive death, disease and violence, than where do \_\_\_\_\_ come from?

B. In reality, "good" is whatever \_\_\_\_\_

### IV. Scientifically

#### A. Fossil Records

##### 1. Lucy

- a. Donald Johnson found a \_\_\_\_\_ and a \_\_\_\_\_
- b. However, toes curved like \_\_\_\_\_ and hands similar to \_\_\_\_\_

##### 2. Piltdown Man

- a. \_\_\_\_\_ and \_\_\_\_\_ found in Germany
- b. Was a fraud, for the skull was \_\_\_\_\_ and the jawbone/teeth were from an \_\_\_\_\_

##### 3. Nebraska Man

- a. \_\_\_\_\_ found in 1917
- b. Discovered to be a \_\_\_\_\_ tooth

#### B. Age of the earth

- 1. Carbon and C-14 dating only goes back \_\_\_\_\_ years
- 2. Many \_\_\_\_\_ along with decay of the earth
- 3. Other evidences:

#### C. DNA/Genetics

- 1. Common \_\_\_\_\_ to common \_\_\_\_\_
- 2. \_\_\_\_\_ Eve
  - a. Possible to trace all DNA back to one woman roughly \_\_\_\_\_ ago

#### D. Mutations

- 1. Always \_\_\_\_\_ information, never \_\_\_\_\_ to it
- 2. \_\_\_\_\_ evolution vs. \_\_\_\_\_ evolution
- 3. No \_\_\_\_\_ or \_\_\_\_\_ exists that causes information to originate in matter alone

### V. Intelligent Design

#### A. Biochemistry

- 1. Complexity of biochemistry
- 2. Everything falls away if \_\_\_\_\_ of people cannot evolve
- 3. How could they be produced by evolution?

#### B. \_\_\_\_\_ Complex

- 1. System made up of several interacting parts that are crucial to it's function
- 2. How to determine:

- a. Specify function of system and all system components
  - b. Ask if all components are required for function
  - c. Is it a PHYSICAL or CONCEPTUAL precursor?
    - PHYSICAL: pre-existing \_\_\_\_\_ (Darwinism needs this)
    - CONCEPTUAL: pre-existing \_\_\_\_\_
3. Minimal function: ability to accomplish a task in physically realistic circumstances
- a. Must be present for a system to be a candidate for Natural Selection
- C. Has religious implications, but does not seek to \_\_\_\_\_  
these implications
